

EIEELOW

How a Texas Litigation Firm Achieved 20%+ Time Savings

CHALLENGES BEFORE AUTOMATION

Challenges In Legal Document Processing

Overcoming Hurdles

Time Consuming

Critical time wasted on non-value add process instead of revenue generating activities for the firm

Difficult To Maintain

Handling hundreds of emails with documents daily posed a significant challenge

2

Risk Of Human Error

Attorneys and paralegals manually sorting through documents and filings increased the risk of error

Collaboration among team members was hindered due to the manual document processing

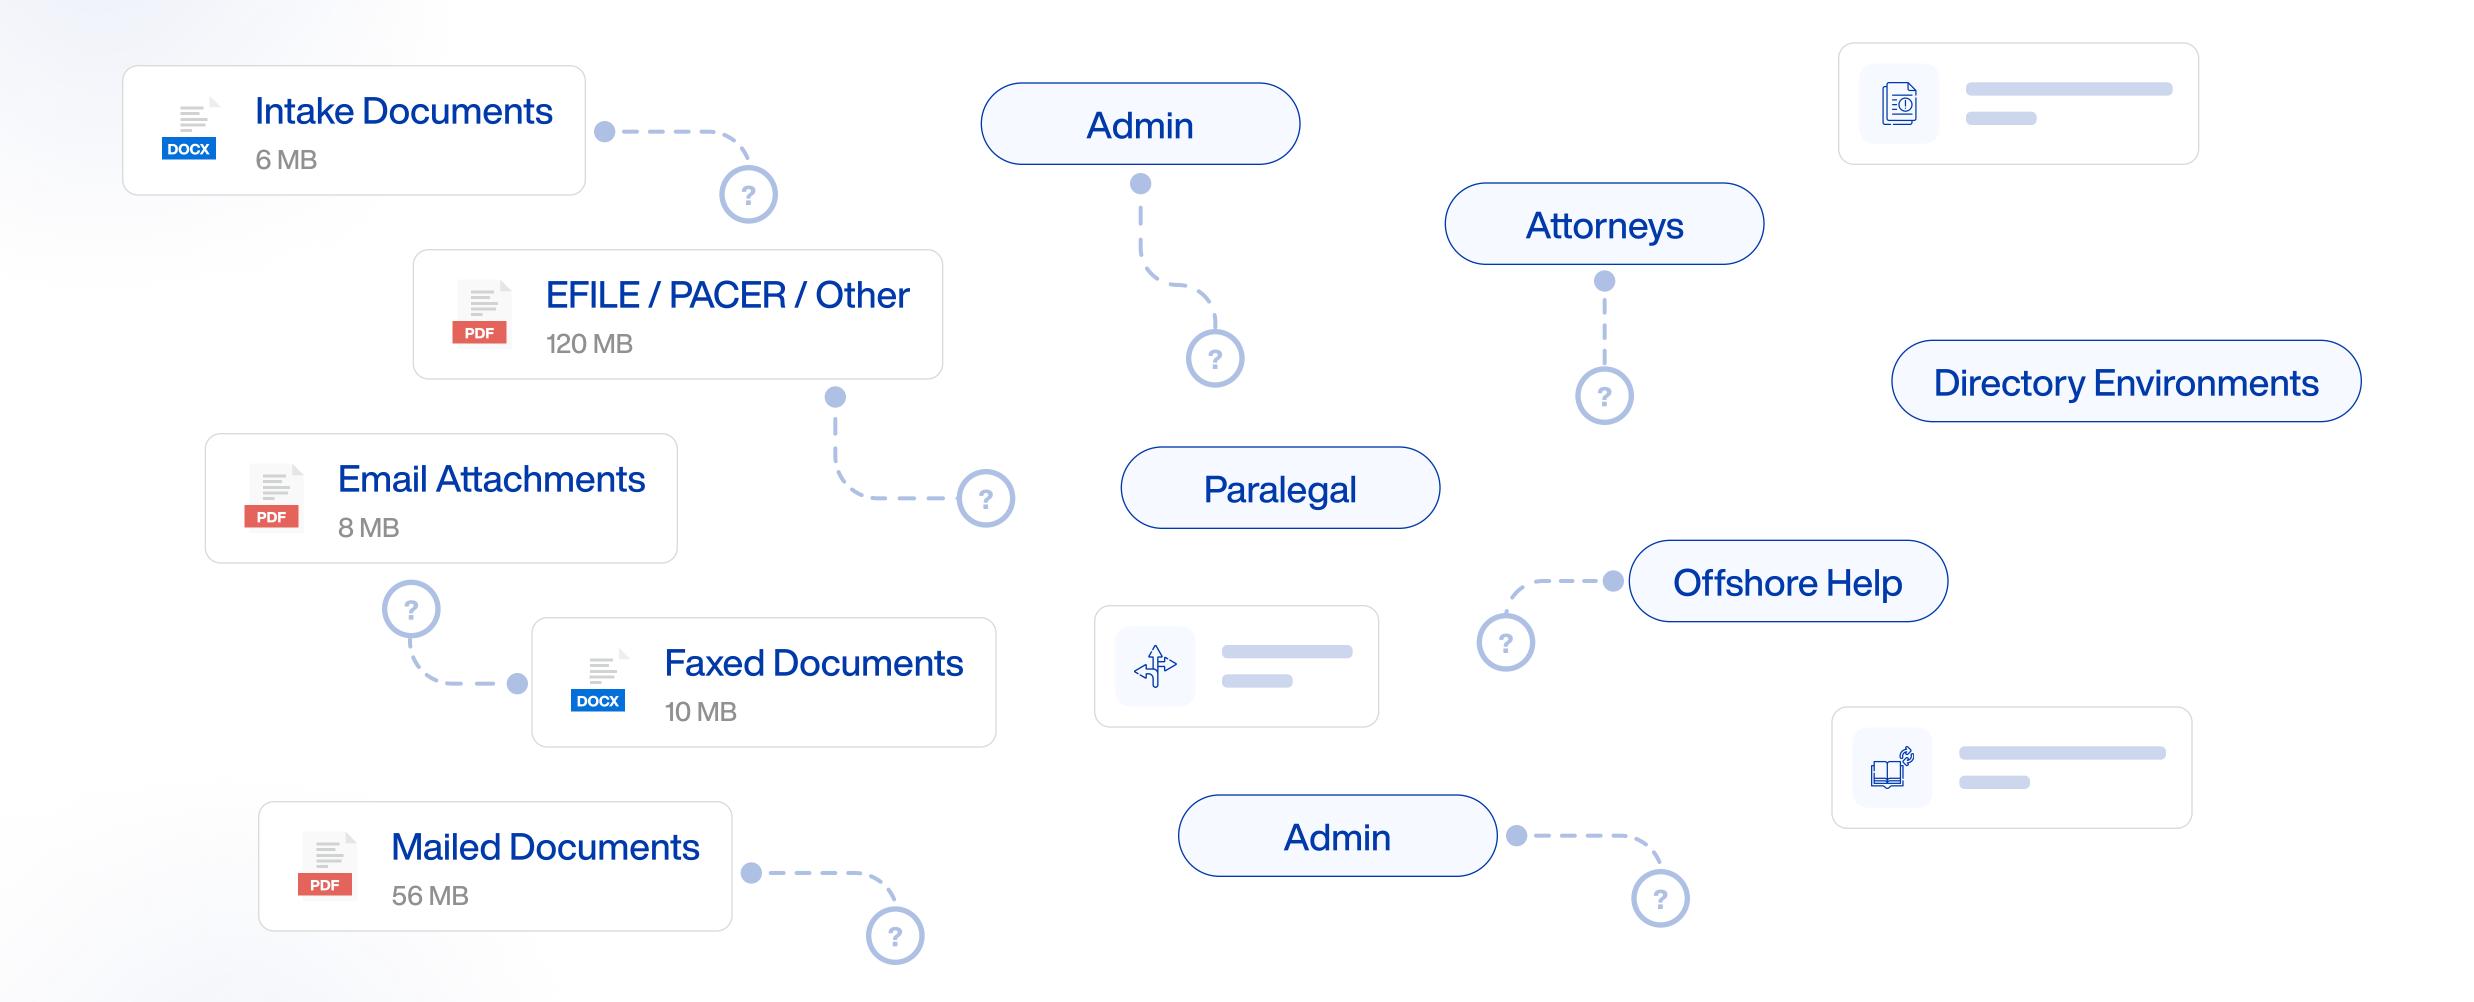

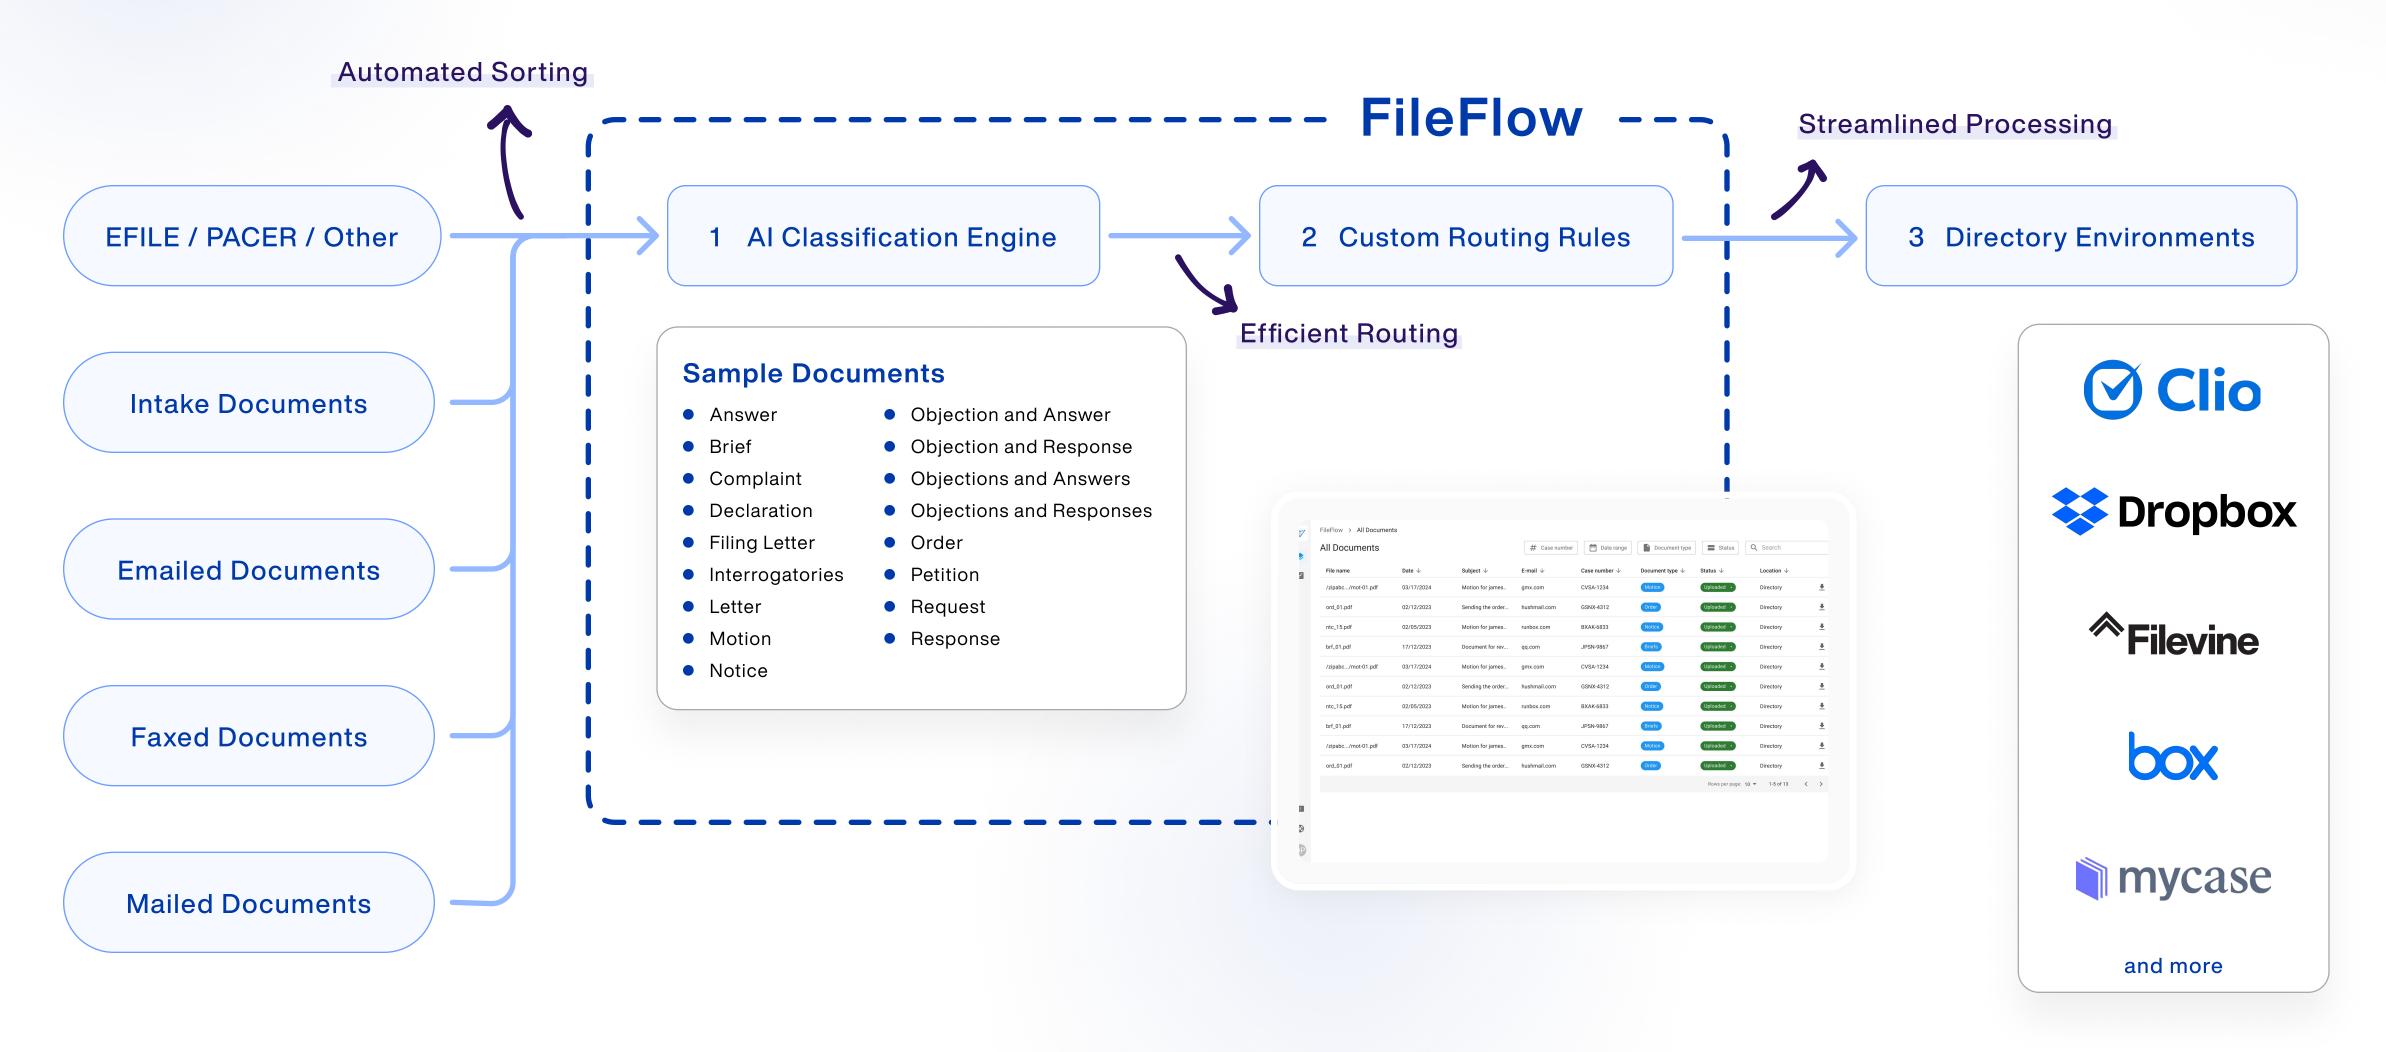

Inconsistent Filing Practices

The firm struggled with inconsistent filing practices, leading to inefficiencies

Process Pre-FileFlow

FileFlow Implemented

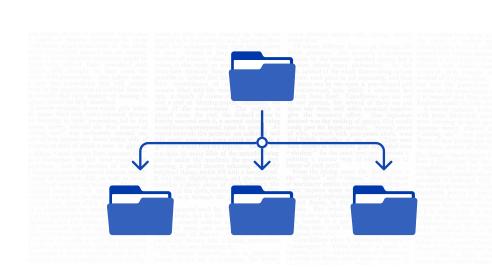

RESULT

Maximize Time And Value For Your Firm

20% **Time Savings**

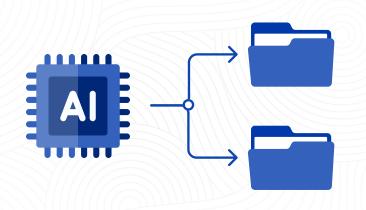

99%

Fewer Errors

Never Lose A Document

Al analyzes each document's content and structure, identifying its legal type and purpose, then routes it to the appropriate directory.

Reduced Errors

Al rapidly processes incoming documents, streamlining workflows by enabling logical grouping and customized organization.

Process = Scale

Learns from any manual corrections, continuously improving its accuracy over time
